Drive Smarter Road Risk Management Programme

Safer Work Driving Workshops

“The best workshops are those where there’s no reason to feel uncomfortable or guilty and with both problem areas, and good practices shared with peers. Drive Smarter structures its workshops to offer useful information in an engaging way. People are made to feel welcome – not like they’re in the dock! What’s more, they come out buzzing and enthusiastic – which means they’re thinking about what they heard and are ready to put the lessons into practice out on the road.”

Professor Steve Stradling,
Traffic and Transport Psychologist

WORKSHOPS INCLUDE:

- **General Drive Safety**
- **Managers’ Responsibilities**
- **Mobile Phones**
- **Green Driving**
- **Speeding**

Drive Smarter offers half-day and full-day workshops focusing on the three most important factors any driver should consider: *The Driver - The Vehicle - The Journey*

Each workshop covers a variety of subjects, including: what makes a safer driver; journey planning; basic maintenance; recognising the risks on a journey; self-control; observation and anticipation skills and greener driving. In addition to our off-the-shelf workshops, and by taking a modular approach, we are also able to customise workshops to meet your exact requirements.

What makes our workshops different

As well as being engaging and effective for your staff, we offer the capability to record all the data from the tests taken during the workshops, and provide you with your own audit trail in the form of a database accessible via our secure website. With this option, you have the ability to run management reports and export the data for your own internal use. This not only allows you to track progress and analyse the need for further training, but it will also aid your organisation if you need to provide proof that you performed duty-of-care in the event of legal action relating to a collision.

The Goal of our Safer Work Driving Workshops

Drive Smarter *Safer Work Driving Workshops* are designed to increase driver awareness and safety, leading to a potential reduction in collisions and insurance claims. This can be achieved by:

- Increasing driver awareness
- Promoting safer driving
- Promoting company policies
- Managing occupational road risk
- Addressing sustainability and green issues

Overview and Content

We offer many types of workshops, ranging from 90 minutes to half-day and full-day, as well as bespoke events to suit your exact needs. All workshops revolve around the driver, the vehicle and the journey, and are delivered by our trainers through a series of short presentations, videos, exercises and discussions. We offer the option of adding tests at the end of each module, and providing you with access to an administration centre where you can view and analyse the results. This is an excellent way to track individual knowledge and training needs.

Bespoke Courses

Bespoke courses allow you to define the content. We offer a number of modules that we can include on a bespoke day including: Driving at Night; Motorway Driving; Green Driving; Spare a Thought for Motorcyclists, and many more.

Workshops can take place at customer premises; however we can work with you to arrange off-site training at an additional cost. All workshops are restricted to 20 participants. All workshops can include training materials. DVDs and database creation can be purchased separately.

Training Solutions for Safer Work Driving

0845 619 7577

What's included?

For the Participant:

- An engaging workshop offering important and useful advice on safe driving
- Information covering topics relating to the driver, the vehicle and the journey
- An experience that offers more than a typical workshop. Participants will watch informative and positive videos, engage in hands-on activities, and test their knowledge throughout the day

For the Manager/Administrator:

- Access to our back-office administration centre
- View individual or team progress
- Run management reports

For the Organisation:

- A cost-effective training solution for your company car drivers, grey fleet or for anyone in your organisation who drives for work purposes
- The ability to customise content to suit you – we can even film and add a message from your directors to be included at the start of each workshop
- The option of multi-lingual delivery – we can customise the workshops for any language

ABOUT DRIVE SMARTER

Drive Smarter is a provider of training solutions for safer work driving. Our solutions are delivered via web-based e-Learning, classroom-based workshops and by in-car driver training. Our company has a single defining purpose – to provide best-in-class training solutions aimed at organisations with employees who drive for work. Our e-Learning Programme, Risk Profile Tool, Workshops and In-Car Training combine to provide the complete solution for organisations looking to meet their duty-of-care and road risk management obligations.

THE DRIVE SMARTER ROAD RISK MANAGEMENT PROGRAMME

Our road risk management programme comprises a suite of solutions that include e-Learning, Risk Profile, Workshops and In-Car Driver Training. It offers your organisation a variety of options for driver training that best suit your needs. You can choose an individual product or select a combination of solutions to build a programme that works best for you.
